

## **CMGP GROUP SELECTED TO DELIVER THE HYDRAULIC DISTRIBUTION NETWORK FOR THE SAÏSS HYDRO-AGRICULTURAL PROJECT**

CMGP Group announces that it has been awarded the public tender for the execution of hydraulic infrastructure works as part of the landmark hydro-agricultural development project of the Saïss plain, located in the Fès-Meknès region.

With a total contract value of MAD 345.5 million (including VAT), the project covers the construction and development of hydraulic infrastructure over an area of 10,000 hectares, with the objective of sustainably securing irrigation for the Saïss plain while significantly reducing pressure on groundwater resources. The project will also enhance the resilience of agricultural operations and improve crop yields through reliable and well-managed irrigation systems.

Led by the Ministry of Agriculture and supported by leading institutional partners, this flagship project fully aligns with the national "Generation Green" strategy. It directly addresses the challenges of water stress, food security, and inclusive rural development. The project involves the conveyance of more than 125 million cubic meters of surface water from the M'dez dam to irrigate the second phase of the project, covering 10,000 hectares, following the completion of an initial phase of equal size. Ultimately, the project aims to irrigate a total area of 30,000 hectares.

### **Statement by Mr. Youssef Moamah, Chairman and Chief Executive Officer of CMGP Group :**

« We are proud to contribute to a project of national importance that fully embodies the challenges of sustainability, water sovereignty, and inclusive agricultural development. This award reflects the recognition of our expertise in delivering complex hydro-agricultural infrastructure projects in support of territories and farmers. Through this achievement, CMGP Group reaffirms its commitment to supporting the transformation of Morocco's agricultural model by providing innovative, sustainable, and high-impact solutions for present and future generations. »

#### **ABOUT CMGP GROUP**

CMGP GROUP is the national leader and a key reference in Africa in irrigation, agri-inputs, solar solutions, and water infrastructure. Leveraging its expertise and integrated model, the Group offers end-to-end solutions covering the entire value chain, from equipment distribution to turnkey project execution. It relies on a wide distribution network, strategic partnerships, and state-of-the-art industrial units, with 1,069 employees. Committed to sustainable development, CMGP GROUP implements its initiatives through the Amane Foundation, which focuses on education, impact-driven entrepreneurship, and environmental preservation.
